Re: Billing for the PASRR Evaluation beginning May 24, 2013

When the PASRR Redesign Project is implemented on May 24, 2013, Local Authorities will begin conducting PASRR Evaluations (PEs) and entering them on the TMHP Long Term Care (LTC) Online Portal. Since the process outlined below is tied to your payment for the PASRR Evaluation, we are providing this information for you to share with your IT Department in order for the appropriate LA system edits and/or changes to be made by the effective date of May 24, 2013.

The successful submission of a PE on the Portal will automatically generate a request for a service authorization, enabling the LA to bill for (IDD or MI) PE Completion. Once the IDD or MI PE Completion service authorization has been created at DADS, the LA will be able to bill through TexMedConnect using the Date of IDD or MI Assessment. The table below contains DRAFT codes that will be used for IDD and MI PE Completion. The LAs will be notified by the end of March when the codes have been finalized but no changes to the codes are anticipated at this time.

Description	Service Begin Date	Service End Date	Service Group	New Billing Code	Service Code	Prod Code Qualifier	HCPCS/CPT Code	Mod 4	Claim Type
IDD PE Completion	Date of IDD Assessment	Date of IDD Assessment	14	M0326	80	HC	T2011	KX	P
MI PE Completion	Date of MI Assessment	Date of MI Assessment	14	M0327	81	HC	T2011		P

Claims for IDD or MI PE Completion can be submitted in the same manner IDD Targeted Case Management claims are currently submitted, using similar Electronic Data Interchange (EDI) transactions. The number of units entered on the claim will reflect the number of hours spent, in quarter hour increments. For example, if it took two hours and forty-five minutes, enter 2.75 units on the claim. There will be no change to the existing EDI process for PE Completion, so there will be no testing with TMHP. This is standard practice when new service codes are added to the system. Please work with your IT staff, software provider or clearinghouse to ensure that they will be ready to submit EDI transactions for PE Completion when the PASRR Redesign Project goes live on May 24, 2013.
