

Zika Information Documents Available Through DSHS and CDC

HHSC staff held a conference call with MCOs last Thursday to discuss Zika. During the call several MCOs requested information on publicly available materials available through the Department of State Health Services (DSHS) and Centers for Disease Control (CDC). MCOs may share materials from DSHS and CDC with members and providers, and do not require approval from Health Plan Management.

The DSHS website includes fact sheets, prevention tips, and videos. These materials are available in English and Spanish, and can be downloaded or ordered from DSHS. The website is available at: <http://www.texaszika.org/materials.htm>.

The CDC also has several print sources available in multiple languages available at: <https://www.cdc.gov/zika/fs-posters/index.html>
