

MCO Non-Compliant File

Effective July 11, 2016, the ACA Non-compliant file placed on TxMedCentral (MCO DATA folder) bi-weekly on Mondays now contains the In-Flight indicator. This indicator represents providers who have submitted their provider re-enrollment application; however, they have not completed the provider re-enrollment process in its entirety. We wanted to include this indicator to address provider concerns about being outreached by MCOs despite submitting an application. Please exclude providers who have submitted their applications for re-enrollment from your outreach activities.
